Geriatric Scene Investigation

How do you put together a profile of someone's life when they can't convey that information? Do you have the skills to follow the clues?

Attend this hands on course that provides a concentrated experience to the elder and disabled support industry. This experience is designed to help you see the clues, track the evidence and get a more complete picture of someone's life.

The meeting location will be set up to feel like home and allows attendees a unique opportunity to gather evidence and search for things like documents, family connections, durable medical equipment, pension providers, health history, benefit coverage, cultural and social needs, medications and more. All of these items come together to create the big picture of a client's life. The more you know, the more efficient your plan of action will be on your client's behalf.

Join industry professionals, with over 20 years of experience assisting the elderly and disable community for this fun, interactive workshop that can help you hone your skills.

Presenters:

Theresa L. Barton, Professional Guardian, Guardian Care Management & Benefits Services
